EDUCATION

University of Strathclyde

Glasgow, UK

MSc, Quantitative Finance with Distinction

- **Relevant Courses:** Machine Learning & Data Analytics, Big Data Technologies, Mathematical & Statistical Finance

University of Toronto

Toronto, CA

HBSc, Economics & Applied Statistics

- **Relevant Courses:** Probability & Statistics, Regression Analysis, Applied Econometrics I & II, Financial Econometrics, Applied Statistical Modelling: Survival Analysis, Experimental Design

EXPERIENCE

Data Analyst - Growth/Marketing

Jan 2022 – Jan 2024

Kora Financial Inc.

Toronto, CA

- Designed, created, and maintained various dashboards and KPIs, and created documentation to facilitate understanding among key stakeholders including growth, and marketing teams.
- Utilized Python and SQL for automating scripts, effectively reducing data preparation and dashboard update time by 50%.
- Conducted weekly analysis of key metrics, translating findings into comprehensive reports shared with senior management for strategic decision-making.
- Conducted in-depth analysis of marketing spending history on multiple ad channels, leading to optimized budget allocation and a significant reduction in marketing spend while maintaining performance.
- Conducted A/B and multivariate testing to refine marketing strategies and enhance the user experience.
- Created a custom A/B testing solution for SMS and push notifications within HubSpot, using Python and Twilio's API, enhancing our marketing capabilities.
- Performed ad hoc analyses as needed, delivering timely insights and actionable recommendations to address specific business inquiries and challenges.

Junior Data Scientist

May 2020 – Sept 2020

Konica Minolta

Glasgow, UK

- Collaborated with a diverse team of data scientists and marketing managers to develop a customer churn prediction model.
- Applied knowledge of gradient boosting methods to train and evaluate a model that could predict the outcome of customer churn with an accuracy of 70%.
- Utilized MS-SQL to query and store data in SQL tables then imported data for cleaning, transformation and visualization in Python.
- Aggregated data into a single large dataset consisting of roughly 100k unique customers using Jupyter Notebook.
- Communicated results in a final report and presentation to the senior data scientist leading the team.

Data Entry Clerk

Jun 2017 – Aug 2017

Vula Civil Engineering Services

Johannesburg, SA

- Prepared documents, based on the company's statements dating back three years, for data entry and updating of information.
- Analyzed source documents for errors ensuring accuracy and verifying where necessary.
- Accurately entered purchase orders and other transactions onto Excel spreadsheets.
- Utilized knowledge of advanced excel functions to allow easier manipulation of data.
