EDUCATION

University of Strathclyde

Glasgow, UK

MSc, Quantitative Finance with Distinction

University of Toronto

Toronto, CA

HBSc, Economics & Applied Statistics

EXPERIENCE

Data Analyst

Jan 2022 – Jan 2024

Kora Financial Inc.

Toronto, CA

- Built interactive dashboards and KPIs to monitor app and marketing performance, supported by documentation to guide stakeholder use.
- Designed and implemented custom funnel and Sankey charts in Python to analyze user journeys and identify key exit-points.
- Optimized marketing spend using statistical analysis to identify high-performing channels, allowing focus on core platforms and cutting budget by 25% while maintaining performance.
- Automated data workflows using Python and SQL, reducing dashboard update time by 50%.
- Developed and ran A/B tests for feature rollouts and marketing campaigns, including a custom push/SMS testing framework using HubSpot and Twilio APIs.
- Performed ad hoc analyses as needed, delivering timely insights and actionable recommendations to address specific business inquiries and challenges.
- Presented findings in weekly reports to growth, marketing, and product teams to support strategic decisions.

Junior Data Scientist

May 2020 – Sept 2020

Konica Minolta

Glasgow, UK

- Collaborated with a diverse team of data scientists and marketing managers to develop a customer churn prediction model.
- Applied knowledge of gradient boosting methods to train and evaluate a model that could predict the outcome of customer churn with an accuracy of 70%.
- Utilized MS-SQL to query and store data in SQL tables then imported data for cleaning, transformation and visualization in Python.
- Aggregated data into a single large dataset consisting of roughly 100k unique customers using Jupyter Notebook.
- Communicated results in a final report and presentation to the senior data scientist leading the team.

Data Entry Clerk

Jun 2017 – Aug 2017

Vula Civil Engineering Services

Johannesburg, SA

- Prepared documents, based on the company's statements dating back three years, for data entry and updating of information.
- Analyzed source documents for errors ensuring accuracy and verifying where necessary.
- Accurately entered purchase orders and other transactions onto Excel spreadsheets.
- Utilized knowledge of advanced excel functions to allow easier manipulation of data.
